

{max2} is the best, even if it doesn't seem like it at first.

{max2} is most likely to return 100 points.

If the third number under the button is 1, you will get the most points.

The points you get on the first pick of a button are the most representative of the button value.

The button values change gradually.

{max2} begins as the best, but the points decrease over time.

The first number has a negative impact on the points. Only choose buttons with a 0 as the first number.

One of the three numbers under the buttons always leads to more points.
